Introduction

StepWise Opportunity:

- Mike – I have floated Dave's resume to get him engaged – his resume is with Tom Kurt
- Tom Kurt would like to talk to Dave to assess his fit for whatever Tom wants to accomplish
- Can you spend 30 mts with Dave – provide him overview of Stepwise as a product, broader architecture – and if you have any awareness (or speculation) of what could Tom be trying to address – share that context with Dave for him to have a contextual awareness - ahead of his connect with Tom
- Call me if we need to talk live

Dinesh's guideline:
StepWise team, Tom Kurt, Mike Hill on StepWise, Listen more, talk less.

Mike's Info:
Tom owns the development of StepWise
Underwriting tool - Databricks is a part of it or maybe for the data pipeline
They have a development team
Mike governs all their cloud properties
Responsible for every deployment
Development is all .NET is a separate team
They have teams in USA, Ireland and India
Optum product, owned by Rich Hunter (Tom's boss)
Technology stack: Kubernetes, Microservices, Databricks
